

# OmniSLAM Modeler

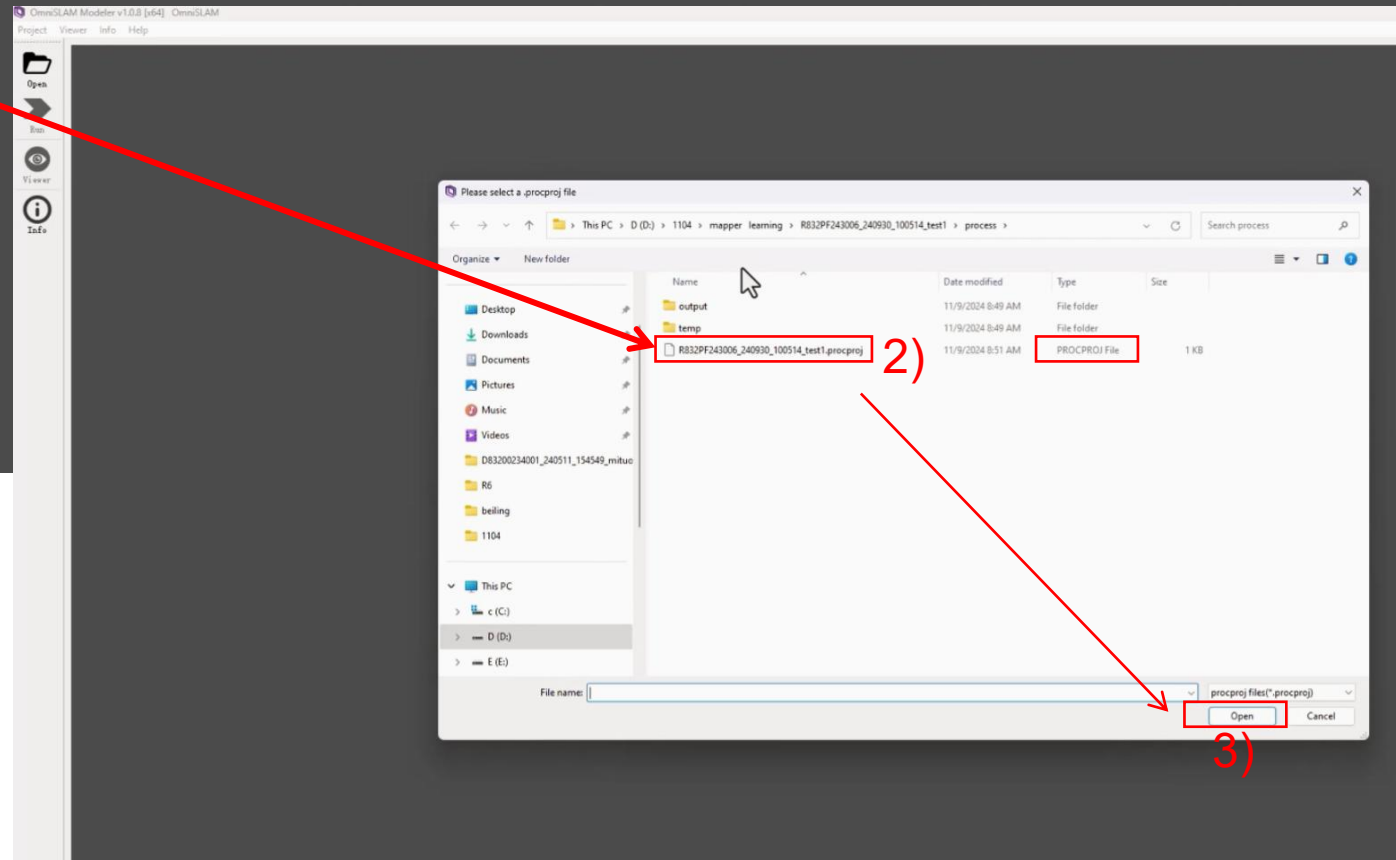

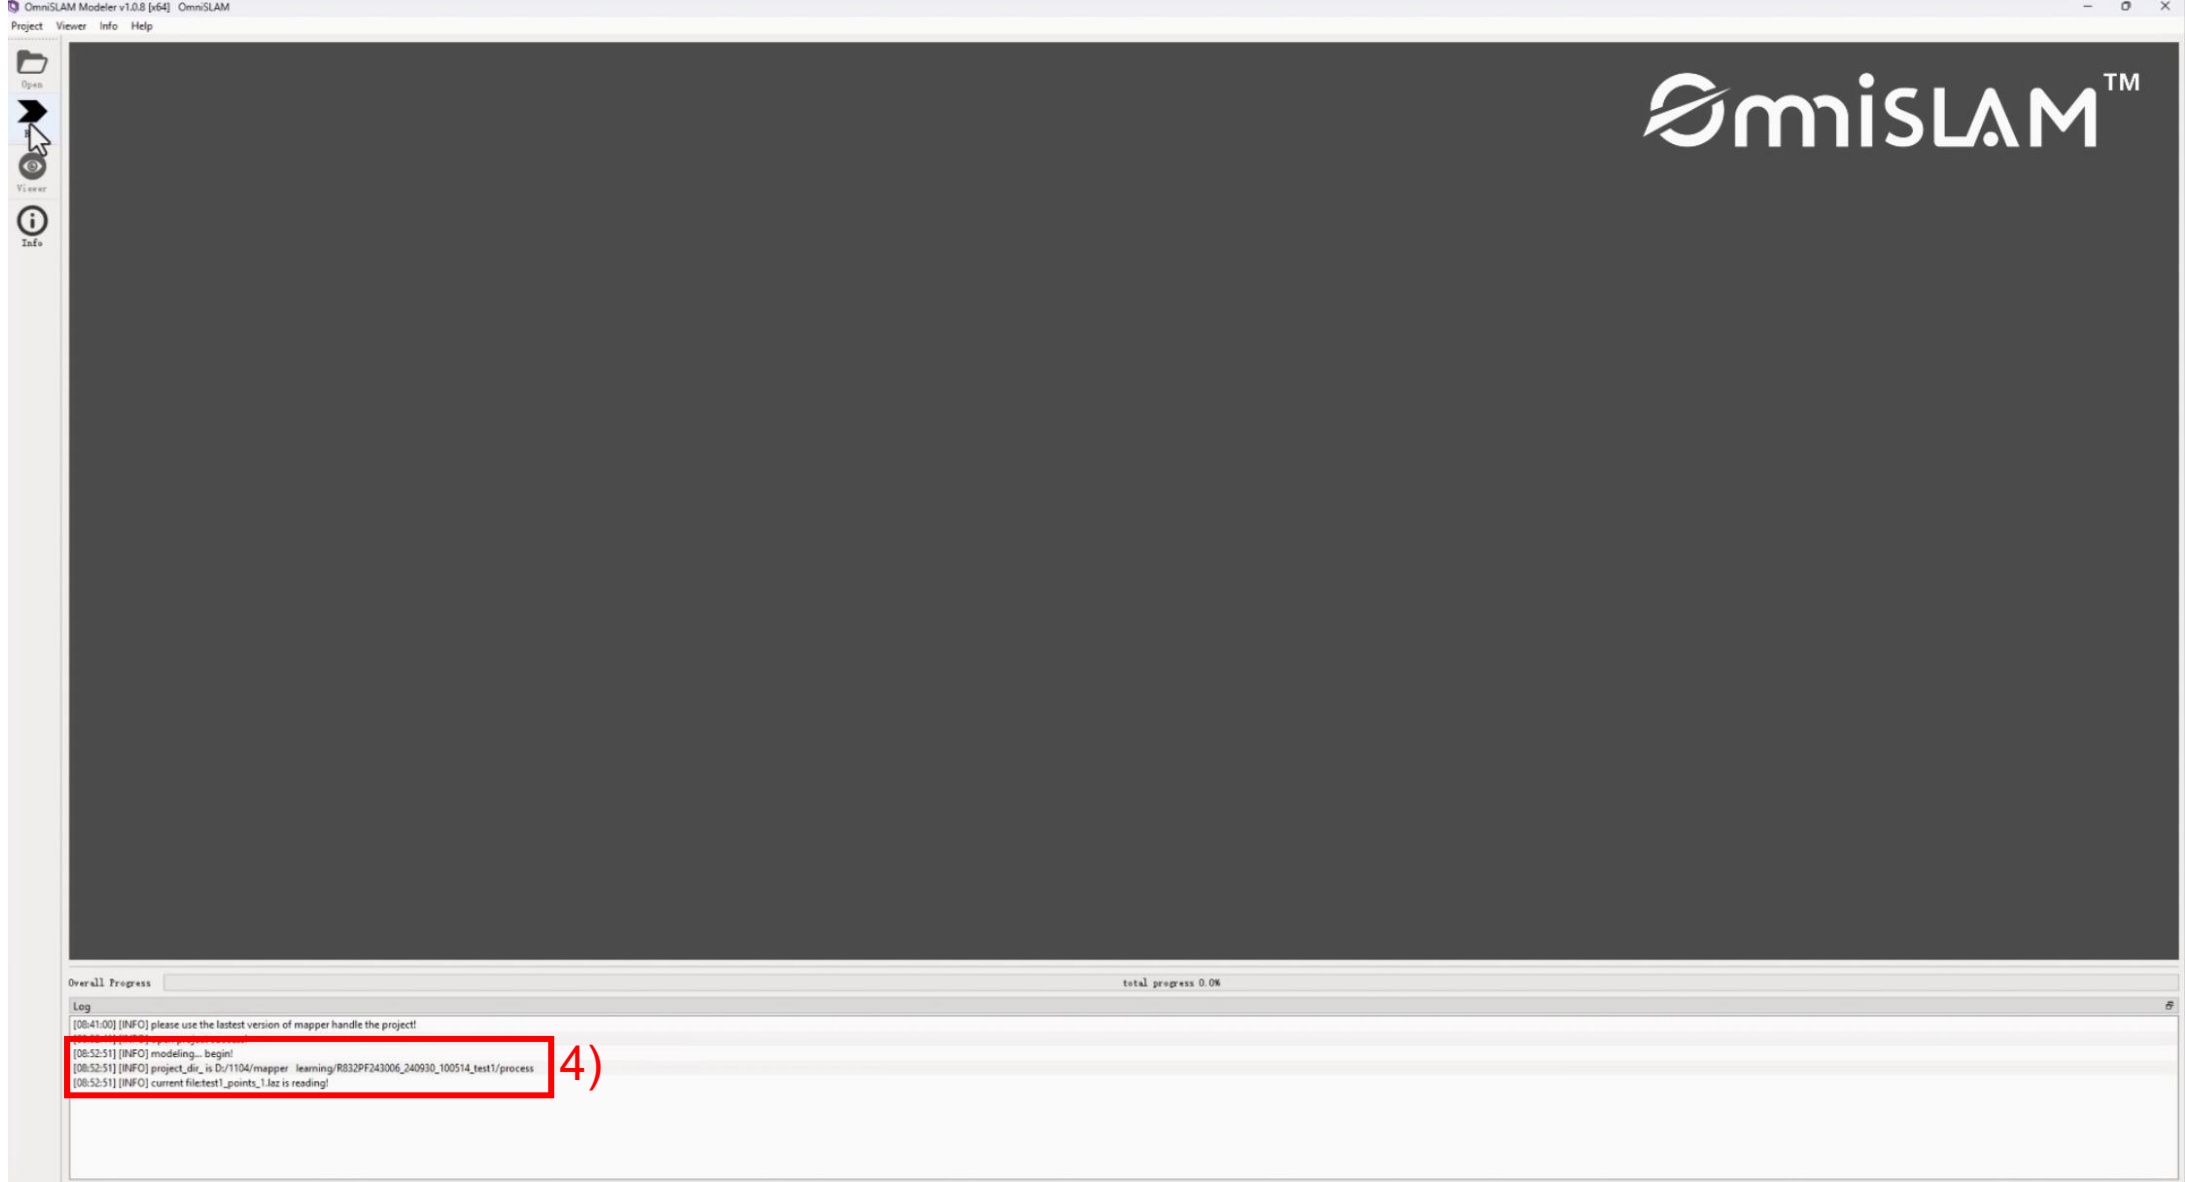

0) 【Info】 , is the Data Log.

 is the switch of turn on/off our log.

- 1) We **【Open】** our data file here, and load it.
- 2) We need to select a **[ PROCPROJ FILE ]**
- 3) **[ Open ]** it.

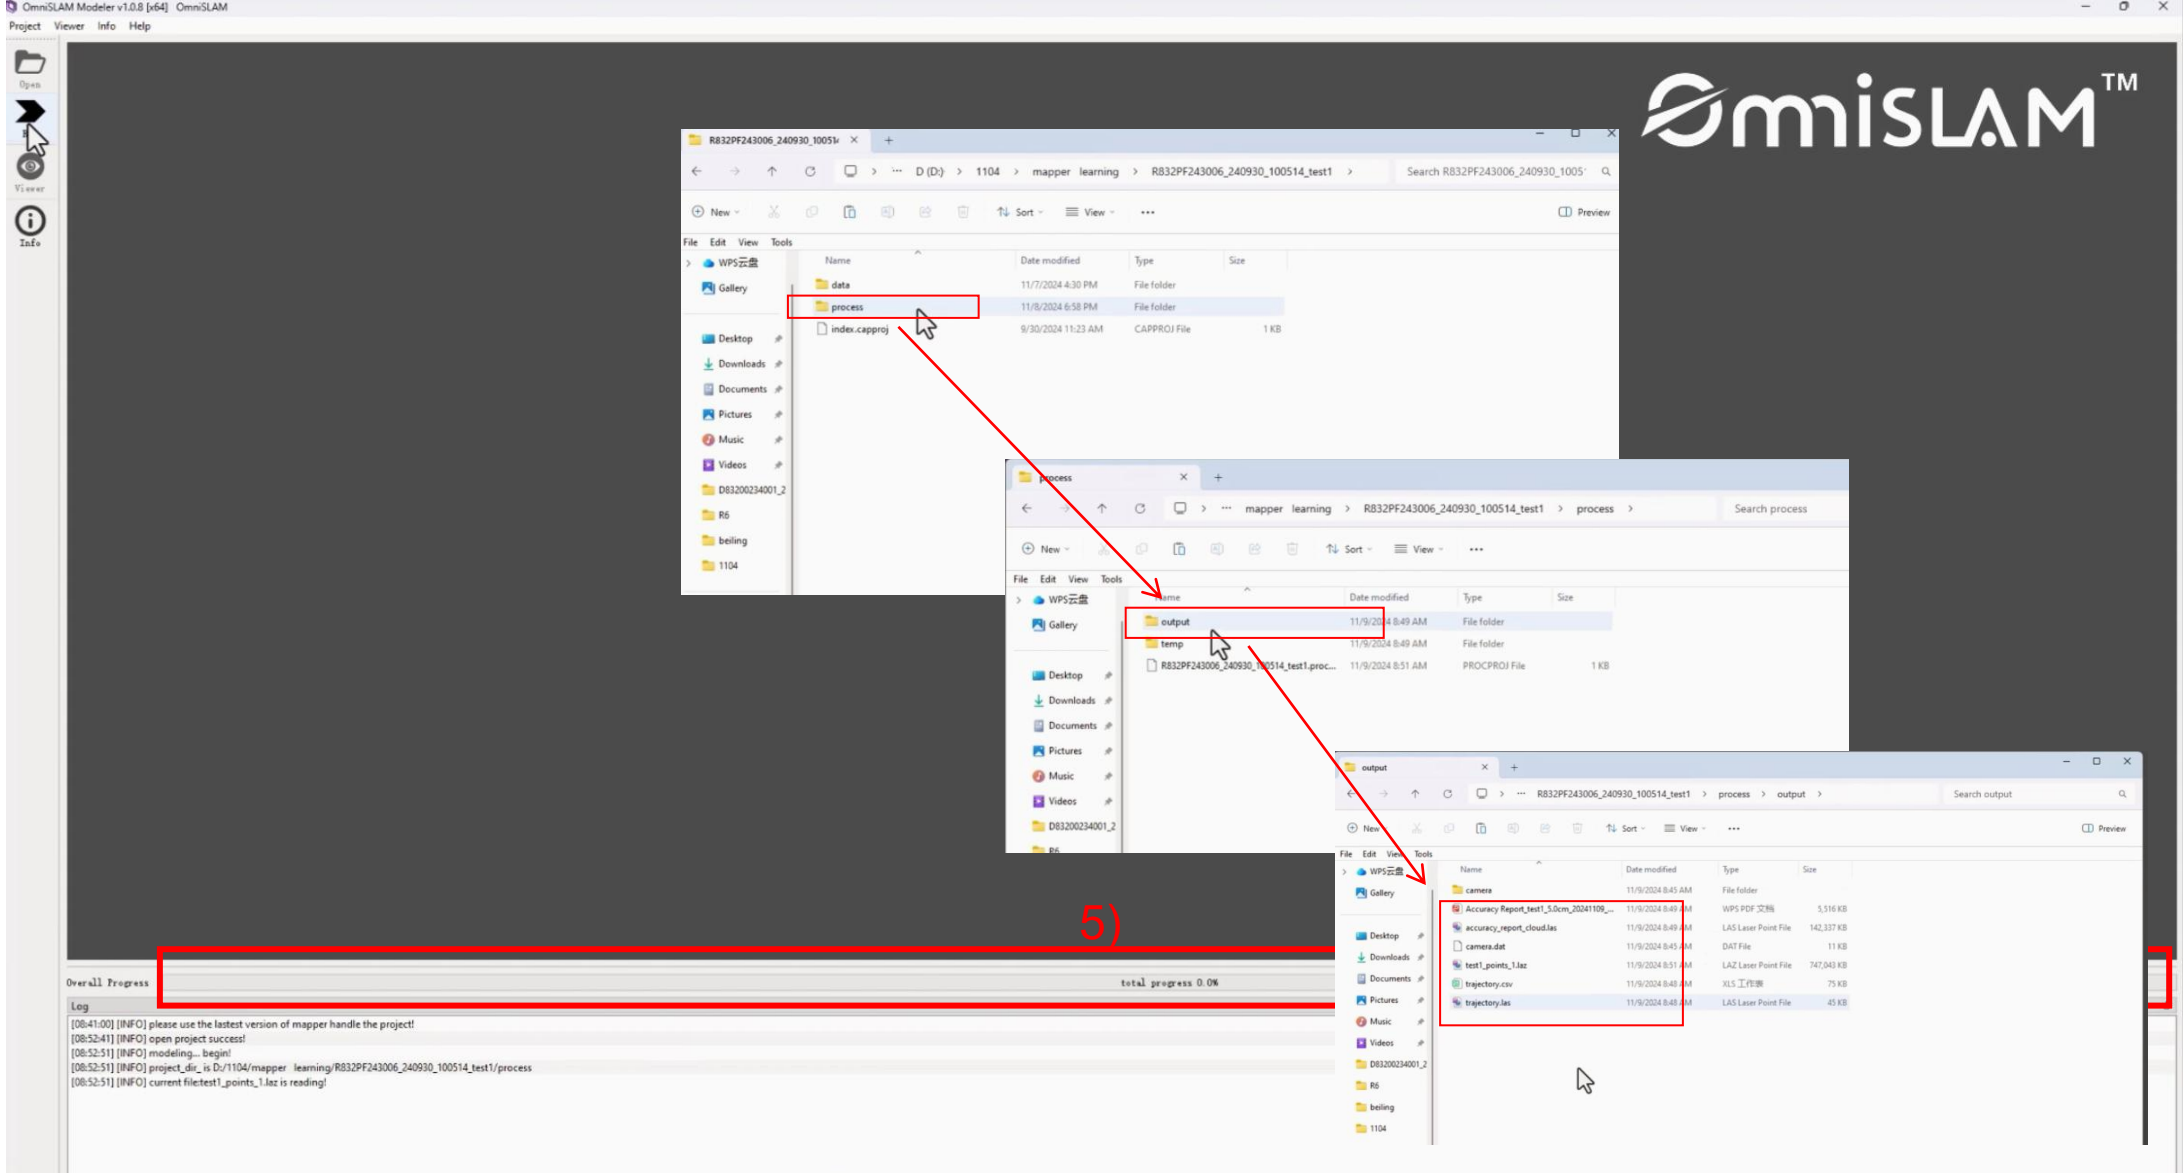

4) You can see, the down left corner has more file names are loading,

it means that the files are starting to **【Run】**

5) Wait for the [ progress bar ] loading to the 100%, that means the model's output has been done.

\* The output model is in the [ process ]-[ output ] file.

6) The color point clouds are the [ data preview ], with the [ progress bar ] loading, the preview content will be more and completed.

**CARVING THE REAL WORLD ACCURATELY**
